Military	WS 9425 (2), Ty. IV	No Current Products - the old 620C was 32% solids, but when MIL-L-46010 was revised (formerly 8937) the solids requirement was changed to 40% min. Everlube 620C can be certified to WS9425, but the purchaser would be required to issue a waiver for the solids of 42% +/- 2%. Plus there are additional charges for Fluid Resistance, IR, & Pigment to Resin Ratio Testing requirements - these tests could also be waived by the purchaser..
